EDUCATION

New York University, NYU Shanghai, Shanghai, China

May, 2023

Bachelor of Science, Computer Science, CGPA: 3.3 / 4.0

Relevant Coursework: Software Engineering, Functional Programming, Information Visualization, Data Structures, Basic Algorithms

TECHNICAL SKILLS

Programming Languages: Python, C, C++, Haskell, JavaScript

Operating Systems: Windows, Linux

Other Tools: Django, D3 Library of JavaScript, LaTeX, Pandas, Numpy, Matplotlib, HTML, CSS

PROJECTS

[My Personal Website](#) (HTML, CSS, JavaScript)

Jan, 2024 - Present

Programmed and deployed a fully functional lightweight web page with modern UI/UX standards and conventions.

- Identified an appropriate template for a professional portfolio page.
- Programmed substantial modifications to the template for effective communication of education, experiences, and skills.
- Incorporated modifications based on user feedback — changed download button to be more intuitive, devised a solution to host multiple formats of a file.
- Actively identifying new enhancements.

[Qalb+: A HealthCare Web Application Prototype For United Arab Emirates](#) (Django)

Aug, 2022 - Dec, 2022

Collaborated with my four team members on all stages of building a web application prototype letting patients meet doctors online.

- Designed the class diagram and one of the sequence diagrams that guided the project.
- Built the feature letting prospective doctors upload their credentials as static files (diploma, license, etc) to the app database.

[Prototyping A Toy Context Free Parser for Chinese Grammar](#) (Python, Haskell, LaTeX)

Aug, 2022 - Dec, 2022

Collaborated with my teammate, Anh Nhat (Daisy) Huynh, and thesis advisor, Professor Paul-André Melliès on parsing algorithms.

- Authored most of the written reports and the literature review that were required by the reviewers.
- Verified that the toy Earley Parser coded by Huynh obtained the theoretical best-case run time of $O(n)$ for certain inputs.

[A Sketch of A Pandemic: Information Visualization of COVID in USA](#) (D3 Library of JavaScript)

Aug, 2020 - Dec, 2020

Created an interactive webpage that contextualized the spread of the pandemic in the USA in a global setting.

- Identified credible information sources on Our World In Data and Kaggle for the project.
- Programmed interactive and accurate views for displaying COVID cases and mortality for 228 countries in the form of treemap and bar charts.
- Devised a choropleth map to show the time evolution of the pandemic across the USA from Jan, 2020 to Dec, 2020.

EXPERIENCE

[Private Tutoring, Introductory Programming \(Python, LaTeX\):](#)

6th Jun, 2022 - 12th Aug, 2022

Client Information: Student at Independent University, Bangladesh; Dhaka, Bangladesh

- Built a highly individualized curriculum tailored to the client's strengths and weaknesses.
- Designed questions to hone algorithmic thinking and conceptual understanding.
- Created an active learning environment by lively lectures, regular class discussions, quizzes, and assignments.
- Reported to my student's guardians with detailed written progress reports on the student's performance.
- Typeset all assignments, quizzes, homeworks, and progress reports in LaTeX for professionalism in presentation.
- Client obtained one of the highest grades in their university course.

ACTIVITIES

[Undecidability, Uncomputability, and Unpredictability Essay Contest](#)

April, 2020

Foundational Questions Institute

- Competing against physicists, engineers, philosophers and other such professionals, co-authored a well rated essay on the topic of intersection of Gödel's incompleteness theorems, the halting problem, and unpredictability in quantum mechanics.
